Ancient Egypt

Ancient Egypt was a civilization of ancient northeastern Africa, concentrated along the lower reaches of the Nile River, in what is now the modern country of Egypt. Ancient Egypt was a powerful kingdom, ruled by a series of rulers called pharaohs. The pharaohs were considered gods and had great power and wealth. The ancient Egyptians built many impressive monuments, including the pyramids and the Sphinx, and developed a complex system of hieroglyphs to record their history and culture. The ancient Egyptians also made many important contributions to science, medicine, and art, and their culture has had a lasting impact on the world.
